

Works on:  
iOS (iPhone®, iPod touch®, iPad®), Android™

## Address Student Performance

Unlike fallible human memory, Teacherpalm remembers which students are doing well, and which students need extra attention.

## Connect

Know all the essential data from Day One of the school year, and have it on hand at all times. Easily learn your new student's name and face to build strong student connections.

## Improved Response Time

Don't get caught without your student data during an emergency situation. Carry vital data such as student medical information and emergency contact numbers with you at all times. Great for field trips, sporting events, and other student outings.

## Know your class; Know your students

Teacherpalm is a mobile application which provides a view of relevant student data which is customized for an individual teacher. The data is extracted from the school's Student Information System (SIS). Each teacher sees detailed information for the students they teach as well as limited data about other students and colleagues at their school. Student data is presented in a teacher-friendly interface that keeps important information up-front and easy to access.

## Why Use Teacherpalm?

Teacherpalm lets teachers identify and know their students faster from the beginning of the school year, and keeps everyone up-to-date throughout the year as information is automatically updated and synchronized with your school's SIS.

- view your class information and teaching schedule by day, semester, or year
- access individual student data by class, with a user interface designed for teachers
- track important student data such as attendance, and report card grades
- store all data on the device so that it's instantly available - even without internet access.
- share class information with other educators such as substitute teachers

Teacherpalm knows what data is important to you.

### Know all about your class\*

- Sue is in Band right now
- Jim's Birthday is tomorrow
- Bob attends my class the least
- Amy has a life threatening peanut allergy
- Tom does well in all classes, and the best in mine
- I need to call Sam's parents, here's their number

### ...and vital information about colleagues and other students\*

- Name and photo
- Life-threatening medical information
- Emergency contacts
- Custody Issues
- Grade and Home Room
- Suspensions

\*Use SIS Liberty to specify exactly what data is included for your class and for the rest of the school.

Student data is available on your mobile device anytime, anywhere.  
*Even without Internet, and off school grounds.*

### Easy and Flexible

Teacherpalm works with almost all Student Information Systems, and on your iOS (iPhone, iPod touch, iPad), or Android device.

### Mobile

Gain access to student information during class, or away on a field trip. Respond quickly to a variety of situations without having to go back to the office.

### Affordable

You don't need a data plan or wireless connection to use Teacherpalm.

\*requires SIS Liberty and Provider

Established in 1984, Discovery Software is a leading education software developer focused upon technologies that help K-12 teachers and administrators be more efficient and effective. Products developed by Discovery Software include Principalm™ for mobile student information and security, and Rubrix™ for mobile evaluation.

Android, iOS, iPhone, iPod touch, and iPad are registered trademarks of their respective owners.
