Introducing:

intuitions

Your intelligent school assistant

When you use the **Principalm** or **Teacherpalm** applications, you hold one of the most powerful tools available for school management and promoting school connectedness. We're happy to introduce our newest product, **Intuitions**, to make it even better.

Intuitions works within the app as your personal assistant – alerting you to birthdays, high or low grades, attendance problems, changes in medical conditions, and more. Intuitions was created to help you connect with your students effectively and to stop small issues from becoming big problems. We think you're going to like it.

Use **principalm** or **teacherpalm** with **intuitions**:

Reduce Dropouts

\$10,500/yr

is the average yearly funding lost when a student drops out.

ONE

Stopping just ONE dropout in a 750 student school pays for Principalm, Teacherpalm and Intuitions for 8 years.

INCREASE FUNDING

Increase Attendance

\$58/day

is the average daily funding per student in the USA.

135,000

student-days of attendance in a 750 student school. Improving attendance by 0.012% pays for Principalm and Intuitions for the year.

Increase Test Scores

Rating

Schools are regularly judged by student test scores.

Connectedness

increases academic performance, test scores, and graduation rates.

IMPROVE LIVES

Foster Success

\$300,000

High School Grads earn 30% more... \$300,000 over their working life.

Graduates

pay more taxes, have better lives, contribute more, cost society less.

Why is School Connectedness Important?

School Connectedness is the belief by students that adults and peers in the school care about their learning as well as about them as individuals.

To quote the CDC:

Intuitions is a module for Principalm and Teacherpalm designed to increase school connectedness.

Because of SIS Liberty, all of your school data stays in your school/district.

"Students are more likely to engage in healthy behaviors and succeed academically when they feel connected to school. The National Longitudinal Study of Adolescent Health looked at the impact of protective factors on adolescent health and well-being among more than 36,000 7th–12th grade students...

School connectedness was found to be the strongest protective factor for both boys and girls to decrease substance use, school absenteeism, early sexual initiation, violence, and risk of unintentional injury (e.g., drinking and driving, not wearing seat belts).² In this same study, school connectedness was second in importance, after family connectedness, as a protective factor against emotional distress, disordered eating, and suicidal ideation and attempts.^{2,3,6}

Research has also demonstrated a strong relationship between school connectedness and educational outcomes,^{8–12} including school attendance;¹⁰ staying in school longer;¹¹ and higher grades and classroom test scores.^{9,12}

In turn, students who do well academically are less likely to engage in risky behaviors.^{13,14} Compared with students with low grades, students with higher grades are significantly less likely to carry a weapon, smoke cigarettes, drink alcohol, and have sexual intercourse.¹⁴"

intuitions

When **Principalm** or **Teacherpalm** receives fresh data, **Intuitions** looks for patterns and creates a list.

This list highlights students for possible intervention; irregular attendance, exceptionally low (or high) grades, events and achievements.

Items in the list (intuitions) make it easy for staff to increase school connectedness by knowing which students need the most attention... NOW!

Intuitions only costs 49¢ per student, per year.
